PATRIOT SUPPORT PROGRAMS of UHS

YOU SERVED US.
Now Let Us Serve You.

A nationwide behavioral health network for Service members, Veterans and their families

About Our Patriot Support Programs

We're dedicated to providing comprehensive mental health care solutions to Service members, Veterans and their families. Recognizing the unique stressors and experiences associated with military service, our facilities offer comprehensive and personalized care for complex challenges such as PTSD, depression, substance use and combat stress.

- Specialized care tailored to the unique needs of Service members
- Evidence-based programming with a focus on reintegration, resilience and post-traumatic growth
- Streamlined admission process and coordinated discharge planning
- Close collaboration between facility staff and referring military and civilian providers

Outpatient Program Options (Adults, Children and Teens)

Partial Hospitalization Program (PHP)
Individuals participate five days per week for six hours a day on average and return home in the evening. This high level of treatment provides the support of peers and can also allow for maintaining some outside commitments.

Intensive Outpatient Program (IOP)
A lower level of treatment that provides three half days per week but still provides structure needed to help individuals improve functioning and continue to practice coping skills in a group therapy format.

In addition to inpatient programming, some locations also offer specialty care programs including:

Military Sexual Trauma: Treatment for emotional disorders caused by sexual violence.

Eating Disorders: Treatment for eating behaviors that adversely affect one's physical and/or mental health.

Women's Unit: Designed specifically to address female-specific behavioral health concerns.

Medically Complex Care: Treatment for behavioral health conditions for individuals who also require medical care.

Residential Treatment for Substance Use Disorders: Individuals reside in the facility for 30 days to stabilize and help minimize the risk of relapse.

Inpatient Programs for Children and Adolescents

We offer inpatient programming to help treat:

- Behavioral disorders including anxiety and depression
- Autism spectrum disorder
- Intellectual and/or developmental disabilities

For specific details on each facility's programs such as specializations, age ranges and gender-specific treatment, visit their website.
